THE CHALLENGE

Beautiful Rugs. Invisible Online.

Hand-tufted rugs are a craft of precision and artistry — but most B2B rug exporters struggle to translate that story online.

📸

No Visual Identity

Product photos don't capture the texture, craftsmanship, or scale — leading to flat, forgettable impressions.

🌍

Untapped Global Buyers

International B2B buyers discover suppliers through social media. Without a presence, you're invisible to decision-makers.

🧵

Story Left Untold

The artisan process, techniques, and heritage — none of it reaches buyers who care deeply about sourcing and craft.

📊

Inconsistent Execution

Managing shoots, content, and posting in-house drains time that should go into production and client relationships.

"Your rugs deserve to be seen the way they're made — with care, intention, and mastery."
